

ANSHUL KUMAR MEENA

Senior Full-Stack Developer & Project Manager

Ajmer, Rajasthan, India | anshulkm17@gmail.com | +91-9429158300 | linkedin.com/in/itisanshulkumar | github.com/iamanshulkumar

PROFESSIONAL SUMMARY

Senior Full-Stack Developer with 4+ years of experience across web development, React Native mobile applications, and backend architecture. Currently Project Manager at Yuvmedia Pvt. Ltd, leading end-to-end delivery of 60+ projects spanning fintech, real estate, automotive, and fantasy sports. Skilled in React.js, React Native, Node.js, Laravel, and WordPress, with a strong foundation in web application security and vulnerability assessment/penetration testing (VAPT). Known for architectural planning, independent delivery of production-grade applications, and driving measurable business impact. Ranked in the top 1% globally on the TryHackMe CTF platform.

TECHNICAL SKILLS

Frontend	HTML5, CSS3, JavaScript, React.js, Next.js, Bootstrap, Tailwind CSS
Mobile	React Native, Expo (iOS & Android), Real-Time Chat, Google Maps Integration
Backend	Node.js, Laravel, PHP, MySQL, REST APIs
CMS & Platforms	WordPress (WooCommerce), Shopify, Wix
Security	Web Application Security, VAPT, Penetration Testing

PROFESSIONAL EXPERIENCE

Yuvmedia Pvt. Ltd	Ajmer, Rajasthan
Project Manager	April 2026 – Present
Android App Developer	January 2025 – Present
Full-Stack Developer	March 2024 – January 2025
Frontend Developer	January 2023 – March 2024
Promoted four times in under three years (Frontend → Full-Stack → Android → Project Manager); currently serving in a dual capacity as Project Manager, leading a 5-member core IT team, and Android App Developer, combining hands-on technical delivery with team and project leadership. - Lead a core IT team of 5, overseeing project planning, task allocation, and delivery timelines while remaining hands-on as an active Android developer. - Led end-to-end development of 7+ mobile applications using React Native with scalable backend architecture (Laravel, Node.js, MySQL). - Architected and delivered high-impact platforms, including: - Investor Land – property listing app with inquiry management and CRM - New/Old Car Choice – car listing and comparison platform with real-time buyer-seller chat - Landsquire – property app with Google Maps integration, CRM lead management, and bidding system - Victory Vision – fantasy cricket app with AI-based score prediction, built on LLM API integration and prompt-engineered forecasting logic - AI Stock Analyser – AI-powered Indian stock market analysis tool, integrating LLM APIs and RAG-based retrieval over market data for insight generation - Wealth Walk – fintech app with broker integration, trading signals, forex data, and screeners - Managed 60+ concurrent projects spanning web development, mobile apps, backend systems, SEO, PPC, and ongoing maintenance. - Reduced dependency on external developers by building full-stack solutions in-house, generating significant cost savings. - Served as technical decision-maker for application architecture, API integrations, and security implementations. - Identified and resolved critical server security vulnerabilities, including removal of backdoors and re-validation of endpoints.	

- Improved real-time performance by optimizing socket connections, state management, and API call efficiency.
- Mentored team members on implementation approaches and engineering best practices.

ASF Digitals

Anand, Gujarat

Web Developer

December 2021 – January 2023

- Collaborated with the web development team across all aspects of website and application design.
- Developed responsive, user-friendly interfaces using React.js.
- Incorporated user feedback to identify and resolve website issues.
- Implemented SEO best practices that improved online visibility.
- Key projects: ASF Nutrition (WordPress/WooCommerce e-commerce platform with UPI payment gateway), Fitness Club (React.js workout recommendation app), and Source One Industrial Supply (Wix product catalog website).
